Objective Statement

As an aspiring front-end developer, my objective is to leverage my technical and creative skills to build beautiful and functional websites and web applications. I am passionate about creating intuitive user experiences and developing responsive, mobile-first designs. My goal is to contribute to the success of a dynamic and innovative team by utilizing my strong attention to detail, problem-solving abilities, and dedication to staying up-to-date with the latest front-end development technologies and techniques.

Skills

HTML	JavaScript	Responsive Design
CSS	React.js	Search Engine Optimization

Projects

Agil: landing page for a fictitious project management software company
- I used React.js to create the website which features a clean and modern design with a simple, easy-to-use interface. It includes a brief introduction of the company's software, a list of features, pricing plans, and a call-to-action button to encourage users to sign up for a free trial.

Realty Rise: fictitious real estate agency website
- features a user-friendly interface with advanced search functionality, allowing users to filter properties based on their location, price, and other key criteria. The site also includes high-quality images, property descriptions, and contact forms to allow users to easily get in touch with the agency. Created with React.js and Rapid Api.

Movie WatchList: allows users to search and add movies to a watch list
- features a user-friendly interface for searching and adding movies, as well as integration with TMDb API to retrieve movie data. Created with React.js and TMDb API.
